SkypeMessagin...w.cs [Design] SkypeMessagingWorkflow.cs SkypeCommandService.cs Form1.Designer.cs

The diagram is a UML Activity Diagram with a central start node leading to a fork. It branches into three main parallel paths. The top path leads to a sub-process box containing a sequence of nodes. The bottom-left path leads to another sub-process box with a similar sequence. The bottom-right path leads to a sub-process box that includes a loop structure. All paths eventually merge at a join node before reaching the final end node. The diagram uses various colors (red, blue, green) for different types of nodes and flow lines.
